

AMC AF -BCV GOTTEX Defensive Fund (USD) A

Fund of funds with special risks

Data as of 30.06.2010

Fund facts

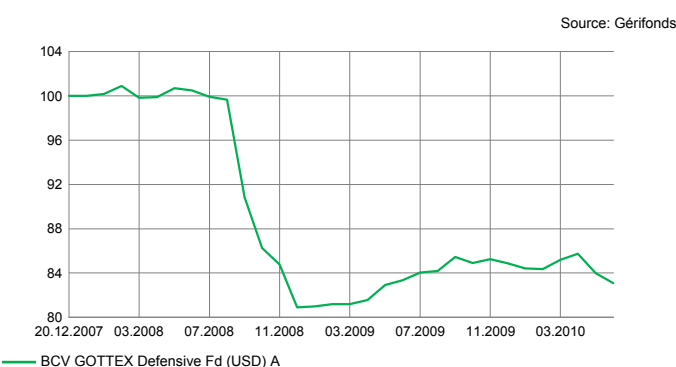

AMC ALTERNATIVE FUND, a fund of funds with special risks incorporated under Swiss law, is an umbrella fund in which the sub-funds are invested in underlying alternative funds that employ investment techniques where the risks involved cannot be compared with those associated with funds invested in traditional securities. The underlying funds are of all types, open- or closed-ended, which may or may not be traded on stock exchanges or other regulated markets that are open to the public, and these funds can take very different legal forms. Investors must be aware of the greater degree of risk associated with investing in such funds, especially as regards the possibility that a significant portion of their assets might be partly or even fully lost. In order to mitigate the risk of such losses being incurred, the fund's mutual fund company undertakes a rigorous due-diligence procedure for choosing and monitoring underlying

funds and fund managers as well as diversifying the investment strategies pursued. Over and above customary market and currency risks, investors' attention is drawn to the risks related to the investment management approach, the marketability of fund units, the liquidity of investments, the impact of redemptions, the pricing of fund units, service providers, shortcomings in transparency and legal risks. These risks are explained in detail in the prospectus.

The objective of AMC GOTTEX Defensive Fund is to achieve long-term growth and low-volatility returns, with a low correlation to equity and bond markets. It invests in underlying funds in accordance with an array of investment strategies selected by BCV's Asset Management (AM) department, such as the following mentioned hereunder.
